## EDUCATION

---

- **Caleb University** Expected Graduation: May 2027  
*Bachelor of Computer Science* *Lagos, Nigeria*
  - **CGPA: 4.23**
  - **Courses:** Operating Systems, Computer Architecture, Algorithms and Data Structures, Intro. to Software Engineering:

## PROJECTS

---

- **Check-in:** A web app that allows lecturers and students track class attendance. [View Live](#) [View Repo](#)
  - Built responsive and dynamic UIs using **React**, **React Router**, and **tailwindcss** for students, teachers, and admins.
  - To preserve attendance integrity, I made use of the geolocation API to make sure students are within the vicinity of the class
  - Designed and implemented **RESTful APIs** for managing users, lecture sessions, and attendance records.
  - Used better-auth for secure, role-based user authentication and session management.

## EXPERIENCE

---

- **Solvestation** Lagos, Nigeria  
*Software Engineer* *Aug 2025 – Present*
  - **Full-Stack Development:** Built and maintained scalable web applications using **React**, **Node.js**, and **PostgreSQL**, focusing on performance and maintainability.
  - **API Development:** Designed and implemented secure REST APIs, integrated third-party services, and optimized backend queries to improve response time by **30%**.
  - **Collaboration:** Worked closely with cross-functional teams (design, product, QA) to deliver features on time and improve user experience.
- **ALX** Remote  
*Software Engineer Trainee* *Jan 2023 – May 2024*  
[View Certificate](#)
  - **Training:** Completed intensive software engineering program covering **algorithms**, **data structures**, **system design**, and **databases**.
  - **Projects:** Developed multiple real-world projects in **Python**, **C**, and **JavaScript**, including full-stack applications and automation tools.
  - **Collaboration:** Worked in distributed teams, using **Git/GitHub**, **Agile practices**, and peer programming to simulate real industry environments.

## SKILLS

---

- Programming Languages: C, CSS, HTML, JavaScript, Python, TypeScript
- Frameworks & Libraries: React, NodeJS, Flask, Express, Next.js, Ruby on Rails
- Databases: PostgreSQL, MongoDB, Redis
- Tools & Platforms: Git, Docker, Supabase
- Other: REST APIs
